C01 Mediator

Communication / OBJECT INTERACTION / ANALYTICAL COLLABORATION

Coordinate interactions through an intermediary.

OBJECT INTERACTION

solid arrow: call/message · dashed open arrow: return/failure · analytical order, not an observed trace

POINTCUT / PATTERN INTERFACE

CONTEXT	Multiple agents or components exchange messages.
TRIGGER	A participant sends a message or requests coordination.
STRUCTURE	Mediator role, participant address, routing policy, and response path.
EFFECT	Interactions traverse a controlled intermediary rather than direct mutable coupling.

CONTRACT / REQUIRED BEHAVIOR

REQUIRES	Participants have stable identities and message schemas.
ENSURES	The mediator records routing and returns a response or explicit non-delivery.
INVARIANT	Participant bypass does not silently alter mediated ordering.
VIOLATION	Mediator failure, invalid participant, or unavailable target is explicit.

Sources: protocol/pattern_diagram_models.yaml (participants + messages); protocol/harness_pattern_specification.yaml (pointcut + contract).

Analytical collaboration only; no repository execution or message order is asserted.
