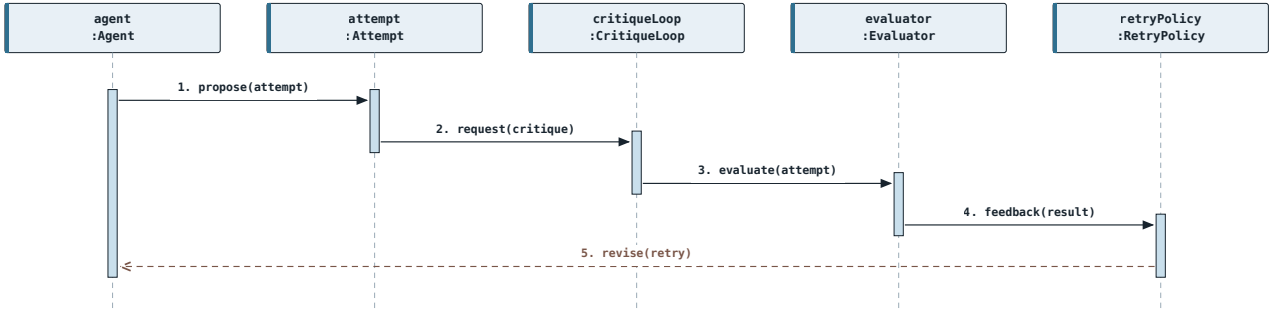
P20 Reflection-augmented loop

Primitive / OBJECT INTERACTION / ANALYTICAL COLLABORATION

Use feedback to revise attempts.

OBJECT INTERACTION

solid arrow: call/message · dashed open arrow: return/failure · analytical order, not an observed trace



POINTCUT / PATTERN INTERFACE

CONTEXT	An attempt can be evaluated before a further attempt.
TRIGGER	The attempt fails or receives a critique.
STRUCTURE	Attempt record, feedback producer, revision input, and retry bound.
EFFECT	A revised attempt uses recorded feedback while preserving attempt lineage.

CONTRACT / REQUIRED BEHAVIOR

REQUIRES	Failure evidence and remaining retry budget are available.
ENSURES	Feedback is attached to the attempt that produced it and is visible to revision.
INVARIANT	Self-critique is not represented as independent verification.
VIOLATION	Empty, contradictory, or exhausted feedback terminates or escalates.

Sources: protocol/pattern_diagram_models.yaml (participants + messages); protocol/harness_pattern_specification.yaml (pointcut + contract).

Analytical collaboration only; no repository execution or message order is asserted.
