P22 Policy floor

Primitive / OBJECT INTERACTION / ANALYTICAL COLLABORATION

Preserve minimum restrictions across customization.

OBJECT INTERACTION

solid arrow: call/message · dashed open arrow: return/failure · analytical order, not an observed trace

POINTCUT / PATTERN INTERFACE

CONTEXT	Multiple general, project, user, or session policies are merged.
TRIGGER	A proposed action is authorized under composite policy.
STRUCTURE	Minimum floor rules, merge operator, and privileged override path.
EFFECT	Composition cannot weaken protected restrictions without explicit authority.

CONTRACT / REQUIRED BEHAVIOR

REQUIRES	Rule identity and priority or set semantics are defined.
ENSURES	The merged result is at least as restrictive as every floor obligation.
INVARIANT	Local customization cannot silently erase a protected deny rule.
VIOLATION	Conflicts produce deny, escalation, or explicit configured precedence.

Sources: protocol/pattern_diagram_models.yaml (participants + messages); protocol/harness_pattern_specification.yaml (pointcut + contract).
Analytical collaboration only; no repository execution or message order is asserted.
