P29 Harness mimicry and service hosting

Primitive / OBJECT INTERACTION / ANALYTICAL COLLABORATION

Preserve an interface while changing its implementation or host.

OBJECT INTERACTION

solid arrow: call/message · dashed open arrow: return/failure · analytical order, not an observed trace

POINTCUT / PATTERN INTERFACE

CONTEXT	One harness exposes or consumes an external agent-client or service interface.
TRIGGER	A remote client invokes the adapter or a hosted backend is selected.
STRUCTURE	Protocol adapter, identity, capability mapping, and service boundary.
EFFECT	The external protocol is preserved while semantics and permissions are translated explicitly.

CONTRACT / REQUIRED BEHAVIOR

REQUIRES	Protocol version and capability mapping are known.
ENSURES	Requests, results, and errors satisfy the compatibility contract.
INVARIANT	Interface compatibility does not erase backend-specific authorization or effects.
VIOLATION	Unsupported capabilities, disconnects, and translation errors are explicit.

Sources: protocol/pattern_diagram_models.yaml (participants + messages); protocol/harness_pattern_specification.yaml (pointcut + contract).

Analytical collaboration only; no repository execution or message order is asserted.
