W02 Routing

Workflow / OBJECT INTERACTION / ANALYTICAL COLLABORATION

Select a specialized path for an input.

OBJECT INTERACTION

solid arrow: call/message · dashed open arrow: return/failure · analytical order, not an observed trace

POINTCUT / PATTERN INTERFACE

CONTEXT	Multiple specialized agent or tool paths are available.
TRIGGER	New input must be sent to a destination.
STRUCTURE	Route schema, classifier or rules, dispatch result, and unsupported case.
EFFECT	One route is selected and its decision is attributable to input evidence.

CONTRACT / REQUIRED BEHAVIOR

REQUIRES	Routes have declared capabilities and selection criteria.
ENSURES	The selected route can handle the input or returns unsupported.
INVARIANT	Dispatch never loses the original request or silently invokes multiple exclusive routes.
VIOLATION	Classifier error or ambiguous route has deterministic fallback or escalation.

Sources: protocol/pattern_diagram_models.yaml (participants + messages); protocol/harness_pattern_specification.yaml (pointcut + contract).

Analytical collaboration only; no repository execution or message order is asserted.
